

Locally Grown Flowers*FRESH* to your Home and Business

We harvest our flowers using a *sustainable treatment process* that guarantees freshness, then we keep them cool and watered and sell or deliver them to you on the same day.

Most businesses that grow cut flowers use pesticides and other chemicals that are transported to your home and can last for days. *Sustainable methods* for growing flowers are safer for your home and family. These methods reduce pollution and employ only *organic methods* of growing using *natural* herbicides, pesticides and fertilizers.

Get better-quality Flowers that are 'a cut above' the rest with TALMAR's Subscription Program!

Flowers are mixed bouquets of two or more types of specialty flowers as listed below:
